

Sensorlink

Health, Safety and Environment Policy

Sensorlink ensure safe operations that protect people, the environment, communities and assets.

In Sensorlink, we have a clear goal to ensure sustainable development, and help improve the environment.

It is Sensorlink's policy to create the conditions necessary for a safe and satisfactory work environment for all personnel. We believe that all accidents can be prevented.

The policy of Sensorlink is that every employee has a responsibility for his own safety. In performance of their duties, all rules and instructions relating to efficient and safe performance of the work shall be followed.

Sensorlink's policy shall contribute to the achievement of safe working conditions and practices in all areas of the company by,

- Creating understanding and interest for safety programmes
- Promoting co-operation in safety matters
- Encourage efforts to prevent any accidents
- Establishing accident prevention activities

To achieve this, Sensorlink will provide or ensure that all personnel have the appropriate health, safety and environmental training to make certain that hazards are recognized, addressed and that safety operating procedures are used.

Sensorlink has a management system in place to record, guide and make corrective actions. The system is reviewed annually or when appropriate.
